Dedicated and result-oriented lifelong learner computer science students, passionate about problem-solving and staying up to date with the latest technology. looking forward to learn more and working with anything which would bring a big impact to society.

Education Level

Universitas Bhayangkara Jakarta Raya - Bekasi, Indonesia <i>Bachelor Computer Science</i> Thesis : "Performance Analysis of Weighted Round Robin and Weighted Least Connection Algorithms on HAProxy Load Balancer in Proxmox Virtualization Environment"	Aug 2021 - Aug 2025
---	---------------------

Work Experiences

PT. Ismata Nusantara Abadi - Bekasi, Indonesia <i>ERP Developer Intern</i> - Successfully completed a comprehensive mini course on Python fundamentals, showcasing a solid grasp of the language's foundational concepts. - Demonstrated proficiency in database design, implementing well structured and efficient databases to support robust applications. - Designed and developed a functional sales application utilizing Odoo ERP, showcasing practical application of acquired skills in a real world context. - Managed a high level of understanding in Accounting and Point of Sale, demonstrating a keen insight into business processes and management systems.	Jan 2020 - Mar 2020
--	---------------------

TIMCorp AWS Solution Architect <i>Cloud Computing</i> - Designed and Implemented a scalable Cloud Architecture for AI Dermatology Chatbot Application using Streamlit serving over 70+ Users with 99.9% Uptime - Led Award-Winning Capstone Team to win Best Performance in the public capstone presentation amongst 5+ teams during public presentation. - Integrated AI Claude 3 with Retrieval-Augmented Generation (RAG) into the AI Dermatology Chatbot, enhancing real-time information retrieval and boosting response relevance by 75%.	Jan 2024 - Jul 2024
---	---------------------

Bangkit Academy <i>Cloud Computing</i> - Architected a versatile backend infrastructure, integrating photo storage capabilities with Cloud Storage and developing an ExpressJS-based authentication system that seamlessly connects to Cloud SQL, with 99.8% uptime. - Engineered and deployed a robust architecture on Google Cloud Platform, optimizing project infrastructure to achieve a 20% reduction in latency and 30% savings in operational costs. - Developed and deployed a serverless Machine Learning application for fruit detection on GCP using Docker containers, reducing deployment time by 40% and improving model inference speed by 25%, processing 50 images per second.	Aug 2023 - Jan 2024
--	---------------------

Universitas Bhayangkara Jakarta Raya <i>Computer Lab Assistant</i> - Performed routine maintenance, updates, and troubleshooting on lab equipment and software for 10 PCs. - Facilitated over 80 practicum sessions, providing technical support to students and instructors. - Monitored lab environment and resolved technical issues to minimize downtime - Maintained equipment logs and reported hardware/software requirements to supervisors	May 2025 - Aug 2025
---	---------------------

Organisational Experience

Google Developer Students Club <i>Head of Back-End Curriculum and Developer</i> - Successfully developed and implemented a backend curriculum that resulted in a measurable increase in community proficiency and project engagement. - Introduced and Mentored a diverse group of 10+ students into the realm of backend. - Actively engaged with the community to assess learning needs, gather feedback, and iteratively enhance the curriculum for optimal learning outcomes. - Collaborated with peers across various roles to deliver a flagship project that showcased the collective talent and technical prowess of the club.	Apr 2023 - Present
--	--------------------

Skills, Achievements & Other Experience

- **English for Business Communication by The British Institute** (2024): Completed a short course of 4.5 Hours with overall score 98%
- **AWS Solution Architect - Associate (CAA-03) Exam**  (2024): Successfully passed the AWS Certified Advanced Architect (CAA-03) Exam with a score of 743.
